SUMMARY

BNSP-certified Data Scientist and Information Systems undergraduate at Telkom University Jakarta (GPA: 3.69/4.00). Hands-on experience in data governance, Python metadata pipelines, SharePoint inventory automation with Power Automate, and business intelligence using Power BI and Power Query.

SKILLS

Programming : Python, SQL, JavaScript, PHP, HTML/CSS
Data & Machine Learning : Pandas, NumPy, Scikit-learn, CRISP-DM, data quality audit
Business Intelligence : Power BI, Power Query
Data Governance & Automation : Metadata management, naming convention audit, SharePoint, Power Automate
Development : Next.js, Laravel, Node.js, RESTful API, Streamlit
Database & Tools : MySQL, Supabase, Redis, Git/GitHub, Vercel, Microsoft Entra

EXPERIENCE

Data & Analytics Intern - PT Telkom Indonesia
August 2026 - October 2026

Chapter Data Science & AI / AIX | Digital Product Division | South Jakarta, Indonesia

- Built a Python metadata pipeline for 26,713 SharePoint file and folder entries, classifying document type, sensitivity, and status and auditing naming conventions.
- Developed Power Automate flows for SharePoint inventory with pagination and CSV export; diagnosed Power Query refresh limitations to assess data freshness.
- Developed a Talent Dashboard portal prototype using Next.js, Microsoft Entra authentication, and Power BI integration.

Academic Research - Business Process Analysis & UI Design
September 2024 - June 2025

PT Estima Reka Sakti | Academic Project | South Tangerang, Indonesia

- Mapped construction quality-control processes through field research and identified operational bottlenecks.
- Designed a web-based monitoring system covering use cases, relational ERD, and UI wireframes.

PROJECTS

AIX Data Governance & Metadata Automation August - October 2026

Internship Project | Python | SharePoint | Power Automate

- Audited a 26,713-entry baseline and identified 22,684 naming violations (84.9%); exported classified metadata to Excel and CSV for review.
- Developed scheduled SharePoint inventory flows with pagination, field mapping, and CSV export.

Daun Merah - Forex Intelligence PWA May 2026 - Present

Personal Project | Vanilla JS | Node.js | Redis | Vercel

- Designed and developed a serverless Progressive Web App integrating macroeconomic data, technical indicators, and market news for forex analysis.
- Implemented Redis caching and distributed locking across data sources including FRED, CFTC, Yahoo Finance, and ECB.
- Integrated multiple LLM providers with fallback and timeout mechanisms to improve service reliability.

Machine Learning-Based Customer Segmentation April 2026

Certification Project | Python | Scikit-learn | Streamlit

- Built a customer segmentation model using the CRISP-DM workflow, including preprocessing, EDA, modeling, and GridSearchCV optimization.
- Developed a Streamlit application to automate segment predictions for new customers.
- Presented the methodology as an invited speaker at Telkom University's Data Science Bukan Cuma Coding webinar in June 2026.

Quality Control System Design September 2024 - June 2025

Academic Research | PT Estima Reka Sakti | System Analysis | UI Design

- Translated field research into business process maps, use case diagrams, a relational ERD, and monitoring system wireframes.

CERTIFICATIONS

Data Scientist Certification, LSP Data / BNSP April 2026

IBM Data Science Professional Certificate, Coursera March 2026

ORGANIZATION

Christian Student Fellowship, Telkom University Jakarta - Committee Chairperson, Easter Retreat May 2025

- Led 56 team members and managed an IDR 36 million budget for a three-day program.
- Coordinated schedules, divisions, communication, and risk management to keep the program on track.

EDUCATION

Telkom University Jakarta 2023 - Present

Bachelor of Information Systems | GPA: 3.69 / 4.00
