SUMMARY

BNSP-certified Data Scientist and Information Systems undergraduate at Telkom University Jakarta with a GPA of 3.69/4.00. Experienced in data governance, metadata management, data pipelines, business intelligence, and application development using Python, SQL, Power BI, and web technologies.

SKILLS

Programming : Python, SQL, JavaScript, PHP, HTML/CSS
Data & Machine Learning : Pandas, NumPy, Scikit-learn, CRISP-DM, data quality audit
Business Intelligence : Power BI, Power Query, Power Automate
Data Governance : Metadata management, naming convention audit, SharePoint
Development : Next.js, Laravel, Node.js, RESTful API, Streamlit
Database & Tools : MySQL, Supabase, Redis, Git/GitHub, Vercel, Microsoft Entra

EXPERIENCE

Data & Analytics Intern - PT Telkom Indonesia
August 2026 - October 2026

Chapter AI & Experience | Digital Product Division | South Jakarta, Indonesia

- Built a metadata catalog pipeline for 26,713 SharePoint repository entries.
- Audited metadata quality and naming convention compliance and supported inventory automation using Power Automate and Power Query.
- Developed a Talent Dashboard portal prototype with Microsoft Entra authentication and Power BI integration using Next.js.

Business Process Analysis & UI Design Research - PT Estima Reka Sakti
September 2024 - June 2025

South Tangerang, Indonesia

- Mapped construction quality-control processes through field research and identified operational bottlenecks.
- Delivered an accepted web-based monitoring system design covering use cases, relational ERD, and UI wireframes.

PROJECTS

Daun Merah - Forex Intelligence PWA
May 2026 - Present

Personal Project | Vanilla JS | Node.js | Redis | Vercel

- Designed and developed a serverless Progressive Web App integrating macroeconomic data, technical indicators, and market news for forex analysis.
- Implemented Redis caching and distributed locking across data sources including FRED, CFTC, Yahoo Finance, and ECB.
- Integrated multiple LLM providers with fallback and timeout mechanisms to improve service reliability.

Machine Learning-Based Customer Segmentation
April 2026

BNSP Data Scientist | Python | Pandas | Scikit-learn | Streamlit

- Built a customer segmentation model using the CRISP-DM workflow, including preprocessing, EDA, modeling, and GridSearchCV optimization.
- Developed a Streamlit application to automate segment predictions for new customers.
- Presented the methodology as an invited speaker at Telkom University's Data Science Bukan Cuma Coding webinar in June 2026.

National Airline Management Application
December 2024

Academic Project | PHP | Laravel | MySQL

- Built modules for flight scheduling, passenger management, and ticket booking using Laravel MVC and relational database design.
- Implemented form validation, middleware-based route protection, and table relationships following Laravel conventions.

CERTIFICATIONS

Data Scientist Certification, LSP Data / BNSP April 2026
IBM Data Science Professional Certificate, Coursera March 2026

ORGANIZATION

Christian Student Fellowship, Telkom University Jakarta - Committee Chairperson, Easter Retreat May 2025

- Led 56 team members and managed an IDR 36 million budget for a three-day program.
- Coordinated schedules, divisions, communication, and risk management to keep the program on track.

EDUCATION

Telkom University 2023 - Present
Bachelor of Information Systems | GPA: 3.69 / 4.00
