PROFESSIONAL SUMMARY

BNSP-certified Data Scientist and Information Systems undergraduate with hands-on experience in data governance, metadata management, data pipelines, and business intelligence. Built a metadata catalog pipeline for 26,713 SharePoint entries during an internship at Telkom Indonesia and developed data-driven applications using Python, SQL, Power BI, and web technologies.

TECHNICAL SKILLS

Data & BI	Python, SQL, Pandas, NumPy, Scikit-learn, Power BI, Power Query
Governance & Automation	Data governance, metadata management, data quality audit, SharePoint, Power Automate
Application Development	Next.js, JavaScript, PHP, Laravel, Node.js, HTML/CSS, RESTful APIs
Platforms & Tools	Microsoft Entra, MySQL, Supabase, Redis, Git/GitHub, Vercel, Streamlit

PROFESSIONAL EXPERIENCE

Data Scientist Intern

Aug 2026 - Oct 2026

PT Telkom Indonesia - Chapter AI & Experience, Digital Product Division

South Jakarta, Indonesia - Hybrid

- Built a metadata catalog pipeline for 26,713 SharePoint repository entries to support repository visibility and governance.
- Audited metadata quality and naming convention compliance, and supported SharePoint inventory automation using Power Automate and Power Query.
- Developed a Talent Dashboard portal prototype with Microsoft Entra authentication and Power BI integration using Next.js.

Business Process Analyst & UI Designer Intern

Sep 2024 - Jun 2025

PT Estima Reka Sakti

South Tangerang, Indonesia

- Mapped construction quality-control processes through field research and identified operational bottlenecks.
- Delivered an accepted web-based monitoring system design covering use cases, relational ERD, and UI wireframes.

SELECTED PROJECTS

Daun Merah - Forex Intelligence PWA

May 2026 - Present

Vanilla JavaScript | *Node.js* | *Redis* | *Vercel* | *AI APIs*

- Designed and developed a serverless Progressive Web App integrating macroeconomic data, technical indicators, and market news for forex analysis.
- Implemented Redis caching and distributed locking across data sources including FRED, CFTC, Yahoo Finance, and ECB.
- Integrated multiple LLM providers with fallback and timeout mechanisms to improve analysis reliability.

SAMUEL ARMANDO NAPITU

DATA SCIENCE | DATA GOVERNANCE | BUSINESS INTELLIGENCE

SELECTED PROJECTS - CONTINUED

Machine Learning-Based Customer Segmentation

April 2026

Python | *Pandas* | *Scikit-learn* | *Streamlit* | *CRISP-DM*

- Built a customer segmentation model using the CRISP-DM workflow, including preprocessing, EDA, modeling, and GridSearchCV optimization.
- Developed a Streamlit application to automate segment predictions for new customers.
- Presented the project methodology as an invited speaker at Telkom University's Data Science Bukan Cuma Coding webinar in June 2026.

National Airline Management Application

December 2024

PHP | *Laravel* | *MySQL*

- Built modules for flight scheduling, passenger management, and ticket booking using Laravel MVC and relational database design.
- Implemented form validation, middleware-based route protection, and table relationships following Laravel conventions.

EDUCATION

Bachelor of Information Systems - Telkom University Jakarta

2023 - Present

GPA: 3.69 / 4.00

Jakarta, Indonesia

CERTIFICATIONS

- Data Scientist Certification - LSP Data / BNSP, April 2026
- IBM Data Science Professional Certificate - Coursera, March 2026

LEADERSHIP

Committee Chairperson, Easter Retreat - Christian Student Fellowship, Telkom University Jakarta (May 2025). Led 56 team members and managed a budget of IDR 36 million for a three-day program.
